

AKASH PANDEY

Full-Stack Developer (MERN) | React.js Developer | Node.js & Express.js Backend Developer

Surat, Gujarat, India | +91 8957447491 | pandeyaakash7491@gmail.com

PROFESSIONAL SUMMARY

Full-Stack JavaScript Developer with 2+ years of experience building production web applications with React.js, TypeScript, Node.js, and Express.js. Skilled in designing RESTful APIs, JWT authentication, role-based access control (RBAC), and database-driven applications using PostgreSQL, MongoDB, and MySQL with Prisma ORM and Mongoose. Delivered a multi-panel e-commerce platform with PayU payment integration and a workforce-management platform with live GPS tracking, and independently deployed production applications on Linux with Nginx and SSL/TLS.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, CSS Modules, Responsive Design, Component-Based Architecture, i18n

State Management: Redux Toolkit, Redux, Context API, React Query

Backend: Node.js, Express.js, REST APIs, API Integration, CRUD Operations, Middleware, Nodemailer

Databases: PostgreSQL, MongoDB, MySQL, Prisma ORM, Mongoose, SQL, Relational Database Design, Data Modeling

Authentication & Security: JWT, Authentication, Authorization, RBAC, bcrypt, OTP/Password Reset, Protected Routes and APIs

Payments & Integrations: PayU Payment Gateway, Third-Party API Integration, Leaflet.js, GPS Tracking

Tools & DevOps: Git, GitHub, Postman, VS Code, npm, pgAdmin, MongoDB Compass, Linux, Nginx, Contabo VPS, GoDaddy DNS, SSL/TLS

PROFESSIONAL EXPERIENCE

React.js Developer, Cowberry

July 2024 - Present

Surat, India

- Build and maintain a production workforce-management application in React.js covering employee tracking, attendance, task assignment, travel, leave, and activity workflows.
- Developed responsive admin dashboards with Leaflet.js live GPS tracking, route and polyline visualization, protected routing, and role-based UI access.
- Contribute to Node.js and Express.js REST API development for employee, attendance, travel, location, leave, and approval modules.
- Implemented authentication, authorization, and RBAC for Admin, HR, Manager, and Employee roles.
- Integrated REST and real-time APIs and synchronized frontend state with backend data for operational dashboards.
- Implemented multi-language support for 22 Indian languages and dynamic theme customization.
- Improved performance with reusable components, lazy loading, controlled rendering, and Leaflet map rendering optimizations.

Frontend Developer Intern, GvClouds Secure

Sep 2024 - Feb 2025

Noida, India

- Built responsive web applications with HTML5, CSS3, and JavaScript from UI/UX design mockups.
- Debugged and optimized existing code for performance and cross-browser and cross-device compatibility.
- Used Git and GitHub for version control and code reviews.

PROJECTS

Harappa Biosciences - Multi-Panel E-Commerce Platform

harappabiosciences.com

Tech Stack: React.js, Redux Toolkit, Context API, Tailwind CSS, Node.js, Express.js, PostgreSQL, Prisma ORM, PayU, REST APIs, Postman, Nginx, Linux

- Built and maintained a production e-commerce platform with separate Admin, Seller, and Customer panels covering products, inventory, orders, users, sellers, and checkout.
- Developed React.js interfaces for product management, shopping cart, authentication, order workflows, and seller and admin dashboards.
- Developed Express.js REST APIs with PostgreSQL and Prisma ORM, including SQL queries and relational data modeling for products, orders, inventory, and users.
- Integrated the PayU payment gateway into the customer checkout flow, including payment API integration and checkout processing.

- Implemented CRUD operations and role-based access control across Admin, Seller, and Customer modules; tested and debugged APIs with Postman.
- Deployed independently to production on a Contabo VPS using Linux, Nginx reverse proxy, GoDaddy DNS, and SSL/TLS.

Lantern360 - Workforce Management & Employee Performance Platform

lantern360.in

Tech Stack: React.js, Redux Toolkit, Context API, Leaflet.js, REST APIs, Tailwind CSS, Node.js, Express.js, Nginx, Linux

- Developed the frontend for attendance, employee tracking, travel, leave management, task assignment, performance monitoring, and reporting.
- Implemented real-time GPS employee tracking with Leaflet.js, including live markers, route polylines, and location-history views.
- Built role-based interfaces and protected navigation for Admin, HR, Manager, and Employee roles.
- Implemented leave applications with multi-level manager and HR approval workflows and status handling.
- Integrated REST APIs for employee, attendance, travel, leave, location, and approval modules, and built travel-session workflows with approval stages and reimbursement data.
- Reduced unnecessary re-renders and improved Leaflet.js rendering during live location updates.

EDUCATION

Master of Science (M.Sc.), Siddharth University	2023 - 2025
Bachelor of Science (B.Sc.), Deen Dayal Upadhyaya Gorakhpur University	2019 - 2022

CERTIFICATIONS

Front-End Developer Certification, Uncodemy, Noida	Jan 2024 - Jun 2024
• 6-month intensive bootcamp in React.js, component-based architecture, and modern web development.
